

Figure 1 Console: message logging

Screenshot: Web page with DevTools Console showing standard log, info, warning, error, table, expanded group, and %c styled message.

Figure 2 Console & network / script issues

Screenshot: Page with pet dashboard and Console showing browser/network errors failed fetch, TypeError, and related messages after using the practice buttons.

The screenshot displays a web browser window with the address bar showing `D:/COMP484/homework10/index.html`. The page content includes a pet dashboard for a pet named **Buddy**, with a weight of **10 pounds** and a happiness of **50**. The dashboard has buttons for **Treat**, **Play**, **Exercise**, and **Nap**. Below the dashboard is a section titled **Chrome DevTools Practice** with instructions to open Chrome DevTools and use the Console and Sources tabs. It includes buttons for **Message Logging**, **Log Info**, **Log Warning**, **Log Error**, **Log Table**, **Log Group**, and **Log Custom**. There is also a section for **Console & Network: browser and script issues** with buttons for **View messages logged by the browser**, **Cause 404 network error**, **Cause TypeError**, and **Cause Violation**. The **Sources: debugging workflow** section is partially visible.

The Chrome DevTools Console shows several messages and errors:

- Message Logging:** The pet dashboard loaded and this button works. Log Info: Current pet_info object is: `{name: 'Buddy', weight: 10, happiness: 50}`.
- Log Warning:** Happiness and weight are clamped at 0 in this demo.
- Log Error:** Example console.error() message for HM10.
- Log Group: Pet Stats** (script.js:98):

(index)	action	happinesschange	weightchange
0	Treat	5	3
1	Play	5	-2
2	Exercise	-4	-3
3	Nap	3	1
- Log Custom: Styled message with %c and CSS!** (script.js:100)
- User message:** After this line, watch for a browser/network error for a missing image. (script.js:113)
- Errors:**
 - GET** `file:///D:/COMP484/homework10/assets/this_image_does_not_exist_devtools_demo.png` net::ERR_FILE_NOT_FOUND (script.js:113)
 - Access to fetch at 'file:///D:/COMP484/homework10/assets/file_that_does_not_exist.json' from origin 'null' has been blocked by CORS policy: cross origin requests are only supported for protocol schemes: chrome, chrome-extension, chrome-untrusted, data, http, https, isolated-app.** (index.html:1)
 - GET** `file:///D:/COMP484/homework10/assets/file_that_does_not_exist.json` net::ERR_FAILED (script.js:121)
 - Uncaught (in promise) TypeError: Failed to fetch** (script.js:121)
 - Uncaught TypeError: Cannot read properties of null (reading 'name')** (script.js:126)
 - Violation demo: long task finished.** (script.js:132)

Figure 3 Console: filtering and mixed output

Screenshot: Console with filter-practice messages together with earlier logging or errors, as appropriate for your rubric.

Figure 4 Sources: file tree and script.js

Screenshot: Sources tab with project files visible and script.js open in the editor (not paused).

Figure 5 Sources: paused on breakpoint; Scope and Call Stack
Screenshot: Execution paused on a debugger line; Scope (Local) and Call Stack visible.

Figure 6 Sources: paused; Scope Screenshot: Second angle of paused state, or omit this figure in your final doc.

Figure 7 Sources: Watch expressions

Screenshot: Paused in code with Watch pane showing expressions such as watchA, watchB, and watchSum

Figure 8 Bug: string concatenation

Screenshot: Page showing wrong result $10 + 3 = 103$ and Console lines showing string types and wrong newWeight.

Figure 9 Fix: numeric addition

Screenshot: Page showing correct result $10 + 3 = 13$ and Console lines showing number types and correct newWeight.
